

## **Learn How to Shoot in 3D**

There is no question that 3D is the hottest new trend in TV and film. **Our current students will be learning 3D by serving an internship on a US TV show that is being shot in Toronto .**

They will learn how to use professional broadcast cameras to create 3D images, see how 3D material is edited, and learn the techniques required to shoot quality 3D.

**We are the ONLY College that has partnered up with a production company that is shooting a TV series in 3D.**

Students who on September 7, 2010 will receive training in 3D, and have the opportunity to apply for intern positions on the TV show.

**Our students will receive training on professional broadcast quality 3D cameras, not standard definition cameras that are fitted with a splitter lens that creates a low quality 3D image. We still have a few places available for September. Call today to find out how to apply and start a new career in 2010!**
