

## Students Work on Professional Projects!

Students who enrolled in September are already working on professional projects.

On Saturday, October 10<sup>th</sup>, ten students will be working on a **music video**. The location is a club in Toronto. It is directed by an experienced music video veteran who has shot music videos all over the world.

In addition, students worked on the set in a TV studio where two episodes of **The Conspiracy Show** were taped. They worked with the Director of Photography, in a state-of-the-art High Definition digital studio.

Students who enrolled in January and April have worked on a reality TV pilot for an American network. And, they recently filmed and edited a celebrity golf tournament.

That's why we say we are North America's most exciting Film College.
